Eestkõnne.

Sellesinnatse nodi=ramato eestkõnne piddi muido wägga pitk saima, ja sedda olleks ka häddast tarwis olnud, sest nodide ja nende märkide polest olleks Eesti lauljatele weel mõnda üttelda; agga et meil pea lotus on, sealtsammast trükkimaiast, kust „Eesti Lauliko wisi=ramat" wälja tulli, üht „Nodi õppetusse ja selletusse ramatut" sada, se läbbi ep olle meile pitka eestkõnnet ennam tarwis, mis ramatut pitkendaks ja kallimaks teeks.

Et nodide kirjutaja ja trükkia teine teisest ni kaugel ellawad, olleks trükki=wiggade polest mõnda puhhastamist nihästi nodide kui sõnnade sees, ja on mõnned laulo wisid selābbi ühhest ehk teisest kohhast nattuke teiseks sanud, kui nende kirjutaja sedda tahtnud; agga ka nende parrandaminne wennitaks meie eestkõnnet ilmaaego liig pitkaks. Kes meie lauljatest nodid tunneb, leiab ka isseennesest nende wiggad ja parrandab neid; kes nodi tundja ei olle, mis kasso sellel pitkast selletussest olleks? Peaks ramatule pärrast teist trükki tarwis tullema, siis saaks trükki=wiggad muidogi wälja pühhitud.

Mõnnele sawad needsinnatsed nodid mõnnest kohhast nattuke liig kõrged ollema, et heäl wälja ei anna. Neid pallume maddalamast heäleseltsist ehk ton=artist peale hakkata, siis on asjad jälle kordas. Se luggu tulleb jubba essimesses laulus warsi kätte. Küssib mõnni: miks neid warsi maddalamast ep olle kirjutud? sellele peame kostma: keik need kõrged nodid on meeste=koride ja essimesse tenori=heäle tarwis pandud, et kui se ramat eddespiddi nelja heälega peaks trükkitud sama, siis üllem heäl ennam tundmatta ei olleks.

Mitto lauljad sawad ehk nukra melega ütlema: „miks need laulud warsi nelja heälega ei olle?" No se olleks hea kül; agga kui hind ka warsi nelja heälega ehk neljakordne olleks, kuida siis? Eks surem hulk neist, kel „Eesti Laulik" kääs on, mitte risti ei saaks ettelõma, kui kuleksid, et Eesti Lauliko „wisi=ramat" 4 ehk 5 kord nenda kallis on, kui Eesti Laulik isse? Kas seal mitte surem hulk ei ütleks: „liig kallis, ei jaksa jure jäda!" ja se olleks üsna tõssi. Kust agga peaks siis kullo wäljatullema? — Korjab agga neid, kes ramatut nelja heälega tahhaksid sada, ülle Eestirahwa ni paljo, et kullo ärratassub, noh, kes sedda siis kelab? Õppigem siis esmalt wisid kätte, küllab pärrast, kui himmo ja tundminne kaswanud, neid ja kes teab kui paljo teisi weel, nelja heälega nähhä ja laulda same!

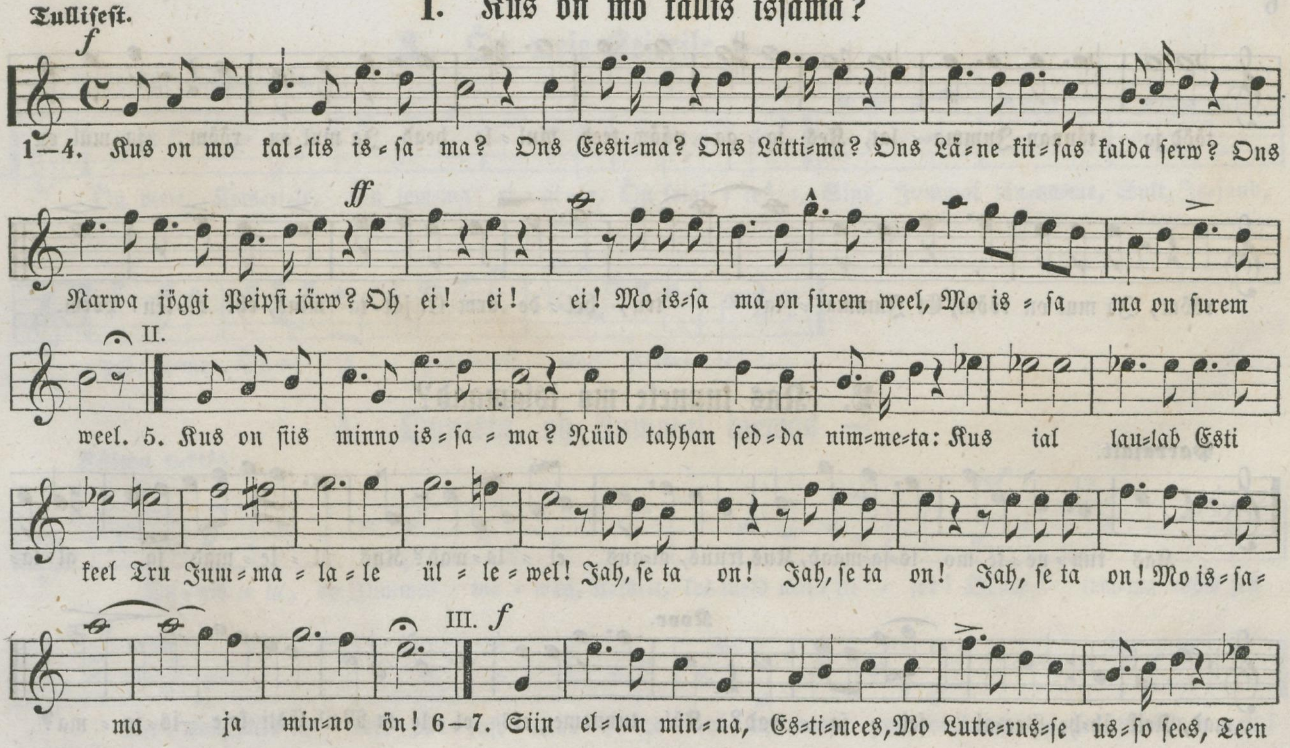

Ja nüüd jäge terweks ja laulge peale!
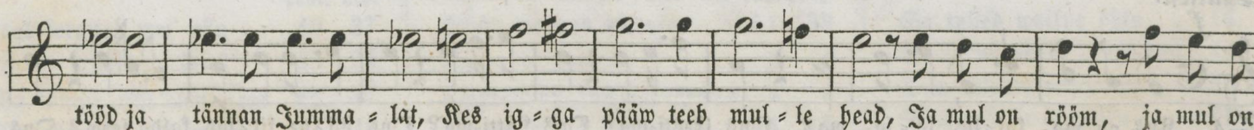

Pernus, Küünla=kuus 1862.
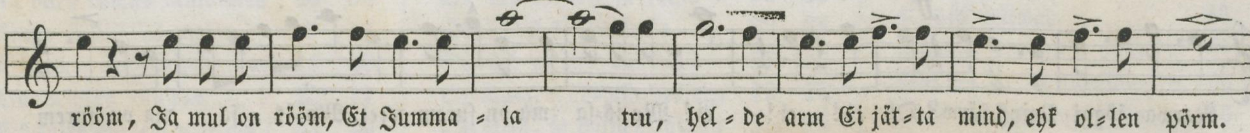

Johann Jannsen.
